Book Formatting Rules

When should I create a New Book?

Usually not at all, unless told to by Narrative Lead. Otherwise Books will be created and sorted by Narrative Lead as needed.

Description, Yes or No?

If the content of the Book isn't clear without a description, always make sure to add one, but not necessarily needed.

When do I add a new Chapter?

- When it's an important Topic with many bigger sub-points
- To sort loose pages if you think the Book is getting too chaotic
- For Books like Factions, always tell the Narrative Lead when adding a new Chapter so they can give the ok and add equivalent Chapters to the other Factions (or any other similar Books)

Should I add Chapter or a Page?

Usually try to add a new Page unless its an Important Topic that will later be expanded. Narrative Lead will add Chapters when needed to avoid inconsistency.

Where do I add the new Page/Chapter?

- If an equivalent Page/Chapter exists somewhere else, just copy the formatting and place it in the equivalent Location
- Unless you're sure where to add your new Page/Chapter, just place it in Idea Collection, it will later be moved to the correct Location
