General Information

How to Use This Wiki:

Platform:

We use the Shelve Game Studio for organizing information.

Structure:

- Books: Each book represents a major topic, such as a faction.
- Chapters and Pages: Within each book, create pages and chapters to break down the topic in detail.
- Summary Page: Each book should include a dedicated page summarizing all key points of that topic, if needed
- Consistency: Structure books similarly when topics are related (e.g., faction books should have a consistent layout).
- Idea Collection: When you are unsure where to put your new topic always place it in the Idea Collection Book, the Page will later be moved (and/or renamed) by Narrative Lead or the person Narrative Lead orders to do it

Additional Guidelines:

- Maintain a clear connection between Git issues and relevant wiki pages.(link in git, same name)
- Link relevant pages to provide easy navigation between related content.
- Mark any content as **WIP** (Work in Progress) if it’s still under development.
- If you have access to Jan Eric's materials, AVOID, IT DOESNT EXIST FOR YOU.
